

## **Helios Energy Selects PanelClaw Solar Mounting Solutions For Ontario Rooftop Market**

TORONTO, Ontario, Feb 8, 2011 -- Helios Energy is pleased to announce that it has selected PanelClaw as one of its preferred solar mounting technology provider for commercial rooftop solar installations in Ontario.

Toronto-based Helios Energy is developing a portfolio large-scale commercial and industrial rooftop solar photovoltaic (PV) systems under the Ontario Power Authority's Feed-In Tariff (FIT) program. Helios will use PanelClaw's innovative non-penetrating Grizzly Bear technology as the solar mounting solution for its commercial rooftop installations.

PanelClaw's eco-friendly Grizzly Bear ballasted solar mounting system features only three major components, low platform loads, and innovations including integrated ballast and roof protection that are designed to speed construction and minimize roof impact.

"Helios is enthusiastic about PanelClaw's technology because it minimizes the potential impact on a building's roof membrane through its non-penetrating design," said Ian Black, Helios Energy Director, Rooftop Solar. "Additionally, it allows for short installation times and ongoing access to the roof in case of repairs – all of which are important to building owners and tenants."

"PanelClaw's partnership with a solar developer like Helios Energy demonstrates the value Grizzly Bear can provide to the Ontario market," said PanelClaw President Costa Nicolaou. "Grizzly Bear's innovative design will enable Helios to maximize array construction speed and minimize roof impact."

### About Helios Energy Inc.

Helios Energy is one of Canada's leading independent solar energy companies. The company was founded in 2006 to develop large scale ground-mounted and rooftop solar energy projects. Helios currently has over 75MW of ground mounted and rooftop solar projects in various stages of development. Headquartered in Toronto, Ontario, Helios Energy is 100% Canadian-owned and operated. For more information, please visit [www.heliosenergy.ca](http://www.heliosenergy.ca).

### About PanelClaw

PanelClaw has a single mission: deliver the next generation of solar mounting systems, with an unwavering commitment to provide exceptional value and service to every customer. With

over 50MW of projects deployed in 2010, PanelClaw offers the innovative products to deliver savings and service on any project. For more information, please visit [www.panelclaw.com](http://www.panelclaw.com).
